

## The Flag Company, Inc. Releases 'Feel Good' Light Lenses to Help Counter Gloomy Economic Outlook

*Perfect for any room, The Flag Company, Inc.'s new 'Feel Good' Light Lenses are perfect decorating pieces to stir up positive sentiments and lift spirits during this trying economical time.*

([PRWEB](#)) March 3, 2009 -- In light of the frustrating economical atmosphere that has gripped the nation, the Flag Company, Inc. recently launched 'Feel Good' Light Lenses as a cheerful decorating alternative. Perfect for waiting rooms and office buildings, 'Feel Good' Light Lenses are a simple, yet effective way to put a smile on faces and lift spirits.

In addition to providing a silent ray of feel-good light, [Light Lenses](#) give any room better visual interest. Whether a doctor's office, conference room, classroom, or even a home basement, light lenses provide the extra pizzazz missing from any room.

The Flag Company, Inc. 'Feel Good' Light Lenses consist of colorful backlit designs that are fabricated to lay in the fluorescent ceiling fixture with a "drop-down door" opening: 24" x 48", 24" x 24", and 12" x 48". Any of the [70 Light Lenses designs](#) can easily be trimmed to fit non-traditional fixture spaces. Customized, one-of-a-kind light lenses can also be crafted from artwork or high resolution photos, giving clients versatility that is limited only by the imagination.

Originally created for doctors' office waiting rooms, Light Lenses provide a comforting sky or tree scene that give patients something soothing to look at while waiting. The result is a more relaxed, less anxious environment.

Today, Light Lenses are still used in doctors' offices around the country, but can also be used for a variety of purposes, including as educational tools. Schools and Day care centers can use Light Lenses as color, letter, or number recognition prompts for toddlers, and as more complex lesson aids - geometric shapes, math formulas, the periodic table, solar systems, and more - for older children. No matter the need, Light Lenses can enhance any learning environment.

Want to spruce up a conference room? Try the newly featured [cloud set](#). The two- or three-panel set of clouds fit perfectly into drop-down door fluorescent lights and instantly rejuvenates the room, giving the impression of a sky light where there is none. This gives employees or clients a more relaxing and enjoyable environment.

About The Flag Company, Inc.:

The Flag Company, Inc. offers a complete range of flags and flag-related products. Custom screen printing and digital printing are available for special events, corporate logos, etc. Stock merchandise includes U.S., state, international and military flags and all types of accessories such as bunting, memorial cases, pennants and more. The Flag Company, Inc. is the nation's largest producer of message flags, offering over 300 different messages, which are used by realtors, restaurants, car dealerships and every other kind of company imaginable.
