

## **Maintain and Care for the LED Light Strand Christmas Tree**

You should maintain and care for the tree light kit in the following areas before storing.

1. Clean and wipe all metal parts. Use rust removal product (not included) such as WD-40 to clean rusty spots, if there are any, where powder coating is damaged. (note: Follow the rust removal product instructions when using it.)
2. Repaint any spots where the paint on the metal part is damaged. (Note: Paint not included.)
3. Clean and wipe the light strands and all other parts. (Important: Do NOT let this product submerge or soak in water.)
4. Be sure all parts are dry before storage.
